

## P3Software Announces Integration Module For QuickBooks Print buyers and resellers benefit from Integration of leading Print Procurement and Accounting Systems

**Natick, Massachusetts December 2006** P3 Software, the world leader in affordable print procurement management software is proud to announce the release of it's long awaited QuickBooks module for P3Expeditor. P3Expeditor, used by print buyers and resellers continues its tradition of growth and innovation.

"We're very excited" stated CEO Caleb Tower "QuickBooks is the marketshare leader in the print reseller segment in the US and prominent in other markets globally. Our clients and prospects have been asking for this for a long time so we marshalled our resources and worked hard to deliver a quality product."

The P3Expeditor system embodies the best practices for procurement of printed goods while it streamlines and automates the process. Users benefit directly from the productivity and organization P3Expeditor delivers. Users typically save 10%-25% by efficiently managing this critical workflow. By expanding this workflow to include Quickbooks savings will be greater.

"This represents a new and interesting opportunity in the marketplace" states COO Bob Yancich. "For well under a \$1000 dollars (US) one can purchase P3Expeditor and QuickBooks and instantly have an end to end automated workflow. We find that to be very compelling."
